13.00	TRAINING WEEK

INTRODUCTION

Tamara Euser will explain some points for the training weeks.

MEET EACH TRAINEE

There will be two rows, one fixed and one not fixed. Each trainee will have three minutes to sit with the other trainees. When the bell rings, the trainees on the non fixed row will have to sit on their right/left side.

HANNA ROUKEMA – ROG SHIP REPAIR PRESENTATION

Hanna Roukema, will introduce the activities she performs on Rotterdam Offshore shipyard. This can be a great opportunity for all to learn what's goes on in a shipyard!

OUTDOOR ACTIVITIES

This is an open proposal. As deemed adequate, those interested on playing some football on the pitch can do. If basketball is preferred, then basketball!! For those not that much into sports, maybe taking a bike and riding around the campus, going to Sliedrecht and coming back for lunch might be a wise decision. Also walking around and catching up with your colleagues on the campus!
